

Misael Andrei Marin

+63 999 995 1973
contact@andreimar.in

Product-driven Software Engineer with **over 2 years** of experience building and maintaining **production-grade web and mobile applications** in startup and fintech environments. Strong focus on native mobile development, with hands-on experience in **iOS (Swift, SwiftUI)** and **Android (Kotlin, Jetpack Compose)**, alongside solid proficiency in modern frontend technologies such as **React and Next.js**.

Known for **rapid ramp-up, ownership of complex features, and delivering clean, scalable implementations that move quickly from development to production**. Comfortable working across platforms and **collaborating closely with product managers, designers, and senior engineers** to translate business requirements into reliable, user-centric solutions. Experienced in operating within high-trust environments where code quality, system impact, and execution speed matter.

PROFESSIONAL EXPERIENCE

Starpay

Programmer Analyst II (Fulltime)

Tech Stack: Swift, SwiftUI, Kotlin, Jetpack Compose, Java, WordPress, Instapay

Kapitolyo, Pasig

June 2025-Present

- Took ownership of key **iOS and Android mobile platforms**, developing and maintaining production-critical features used by **over one million users**.
- Led implementation of **major mobile feature rollouts and refactors**, improving performance, stability, and maintainability across platforms.
- Actively contributed to **end-to-end delivery** of mobile features, from requirements analysis and implementation to deployment and post-release support.
- Developed and optimized **backend logic and scripts** supporting customer-facing fintech features, including transaction-related workflows with direct business impact.
- Managed and enhanced the company's **main corporate website frontend** using WordPress, implementing new designs and features to improve usability and accessibility.
- Served as a **go-to engineer for mobile development**, providing knowledge transfer, mentoring teammates, and assisting in unblocking complex technical issues.
- Worked closely with product managers, designers, QA, and senior engineers in a **high-trust environment**, frequently entrusted with tasks beyond typical mid-level scope.
- Participated in production deployments and system-critical changes, ensuring reliability and adherence to quality standards.

Tolstoy

Full Stack Developer (Fulltime)

New York, NY

February 2025-May 2025

Tech Stack: React.js, Next.js, AWS, Typescript, Shopify

- Developed and maintained **20+ features across 3 global fashion brand products**, enhancing user experience and performance
- Created **reusable and maintainable AWS Lambda functions** to support scalable and efficient cross-project functionality
- Built scalable **Shopify websites and app components** to deliver dynamic, customizable solutions for end users
- Leveraged AI tools to **optimize development workflows, enhance productivity, and streamline product delivery**

Control Flow Labs

Frontend Software Developer (Fulltime)

BGC, Taguig

April 2024–February 2025

Tech Stack: Next.js, React Native

- Led the frontend development of a dashboard that **handles 600+ amount of live chats per day** by utilizing an AI-driven chatbot tailored for the clients' data **reducing clients' workload by over 40%**
- Built a customized calendar that **organizes 50+ events per month** to help a client keep track of the **impact of different events** for their sales **improving their decision making by over 30%**
- Built **100+ customized and reusable react components** for 2 projects that can be used for different dynamic use cases
- Implemented internalization and localization to 1 project using i18next enabling locale based translations to cater for users globally.

Baytech BPO

Web Developer (Intern)

Tech Stack: React.js, Vue.js, PHP

Ortigas, Pasig

Sept 2023–Dec 2023

- Assisted and Implemented 60+ Frontend Tickets for 3 different projects by using different Frontend Frameworks
- Optimized and cleaned Frontend codes in 3 projects to streamline the experience for other developers
- Made 10+ pages of different projects dynamic to be usable in different screen sizes and resolutions

PROJECTS AND EXPERIENCES

Full Stack Developer - Endotracker (Capstone Project)

An EHR made for endocrinologists focused on interoperability with different clinics.

July 2024

Tech Stack: Next.js, Python, FHIR, Supabase

Frontend Developer - DLSU Hackercup 2024 (2nd Runner-up)

A hackathon hosted by DLSU's La Salle Computer Society wherein teams from different universities in the Philippines competed to create an innovative solution for SDG 4: Quality Education

July 2024

Full Stack Developer - Heart Disease Risk Predictor

A playground project that utilizes Gemini by google to predict the risk of heart disease based on different data provided by the users.

June 2024

Tech Stack: Next.js, Gemini

Full Stack Developer - Demolay ManSys

Sept 2023

A Management System made for DeMolay, a youth organization. It is used to manage members, applications, events, awards, and many more.

Tech Stack: React.js, Node.js, Mongodb

Full Stack Developer - DLSU StudyBud

March 2023

An android application that aims to help DLSU Students manage their time and tasks for their academics and organizational responsibilities.

Tech Stack: Kotlin, Firebase

EDUCATION

De La Salle University

Manila, Metro Manila

Bachelor of Science in Information Systems,

July 2020 - Dec 2024

GPA: 3.3/4.0 - Honorable Mention

SKILLS

Full Profile: <https://andreimar.in/experience>

- Full Stack Development
- Mobile Development
- Swift / SwiftUI / Kotlin
- Development Frameworks
- Database Management
- UI/UX Design and Implementation
- NextJS, ReactJS, VueJS
- Typescript, Python, Java
- SQL, NoSQL
