contact@andreimar.in

Product-driven Software Engineer with over 2 years of experience building and shipping **production-grade web, mobile, and backend systems** across fintech and startup environments. Experienced across iOS (Swift/SwiftUI), Android (Kotlin/Jetpack Compose), React/Next.js, Java, Go, and Flutter, with a track record of **taking complex products from requirements to production**. Known for **rapid execution, end-to-end ownership, and solving high-impact technical problems** across platforms. Increasingly focused on technical leadership, mentoring engineers, internal platform development, and establishing scalable engineering practices.

PROFESSIONAL EXPERIENCE

Starpay

Software Engineer II (Fulltime)

Kapitolyo, Pasig
June 2025-Present

- Tech Stack: Swift, Kotlin, Java, Go, NextJS, React, Flutter, MySQL, WordPress, InstaPay
- **Took end-to-end ownership of STEP**, an internal company platform, driving implementation from requirements and architecture through development, deployment, and production support; delivered the platform to production within months.
 - **Spearheaded the development of Starpay’s growing internal application ecosystem**, driving employee-facing and operational platforms that replace fragmented workflows with purpose-built, in-house systems and establish reusable foundations for future internal products.
 - **Currently building full-stack internal platforms using NextJS, Go, and MySQL**, digitizing HR and operational workflows across employee management, timekeeping, leave and overtime processing, payroll documents, approvals, roles, and scheduling.
 - **Owned and delivered production-critical iOS and Android features serving over one million users**, working across Swift, SwiftUI, UIKit, Kotlin, Jetpack Compose, Java services, and supporting systems.
 - **Led the technical implementation of Inactive Account Charging**, designing and optimizing a data-processing script that accurately identifies eligible accounts for charging while significantly improving processing speed and computational efficiency.
 - **Delivered eKYC integration and user-upgrade flows across mobile and backend systems**, implementing customer-facing KYC experiences, applicant creation, submission workflows, and supporting services.
 - **Delivered major customer-facing initiatives including the Send Money redesign, Mobile UI Redesign, and authentication enhancements**, working across mobile, web, and backend systems from implementation through production.
 - **Led major web development and modernization initiatives**, including rebuilding key web platforms from the ground up and delivering the redesigned Starpay corporate website.
 - **Expanded beyond frontend and mobile development into backend services, database investigations, production troubleshooting, and cross-platform technical decision-making**, collaborating closely with Product, QA, DevOps, DB administration, and senior engineering.
 - **Worked beyond implementation by translating ambiguous business requirements into technical solutions, documentation, and delivery plans**, proactively driving initiatives with minimal engineering supervision.
 - **Currently lead engineers within cross-team projects**, providing technical direction, knowledge transfer, implementation guidance, and code reviews while delegating development ownership to strengthen other engineers' technical capabilities.

Tolstoy

Full Stack Developer (Fulltime)

New York, NY
February 2025-May 2025

- Tech Stack: React.js, Next.js, AWS, Typescript, Shopify
- Developed and maintained **20+ features across 3 global fashion brand products**, enhancing user experience and performance
 - Created **reusable and maintainable AWS Lambda functions** to support scalable and efficient cross-project functionality
 - Built scalable **Shopify websites and app components** to deliver dynamic, customizable solutions for end users
 - Leveraged AI tools to **optimize development workflows, enhance productivity, and streamline product delivery**

Control Flow Labs

Frontend Software Developer (Fulltime)

Tech Stack: Next.js, React Native

- Led frontend development of an AI-driven customer service dashboard **handling 600+ live chats per day, reducing client workload by over 40%.**
- Built a customized calendar that **organizes 50+ events per month to help a client keep track of the impact of different events** for their sales **improving their decision making by over 30%**
- Built 100+ customized and reusable React components for 2 projects** that can be used for different dynamic use cases
- Implemented internationalization and localization to 1 project using i18next enabling locale based translations to cater for users globally.

BGC, Taguig

April 2024–February 2025

Baytech BPO

Web Developer (Intern)

Tech Stack: React.js, Vue.js, PHP

- Assisted and Implemented 60+ Frontend Tickets for 3 different projects** by using different Frontend Frameworks
- Optimized and cleaned Frontend codes in 3 projects to **streamline the experience for other developers**
- Made 10+ pages of different projects dynamic to be usable in different screen sizes and resolutions

Ortigas, Pasig

Sept 2023–Dec 2023

PROJECTS AND EXPERIENCES

Full Stack Developer - Endotracker (Capstone Project)

An EHR made for endocrinologists focused on interoperability with different clinics.

Tech Stack: Next.js, Python, FHIR, Supabase

July 2024

Frontend Developer - DLSU Hackercup 2024 (2nd Runner-up)

A hackathon hosted by DLSU’s La Salle Computer Society wherein teams from different universities in the Philippines competed to create an innovative solution for SDG 4: Quality Education

July 2024

Full Stack Developer - Heart Disease Risk Predictor

A playground project that utilizes Gemini by google to predict the risk of heart disease based on different data provided by the users.

Tech Stack: Next.js, Gemini

June 2024

EDUCATION

De La Salle University

Bachelor of Science in Information Systems,

GPA: 3.3/4.0 - Honorable Mention

Manila, Metro Manila

July 2020 - Dec 2024

SKILLS

Full Profile: <https://andreimar.in/experience>

Mobile: Swift, SwiftUI, UIKit, Kotlin, Jetpack Compose, Flutter

Web: React.js, Next.js, Vue.js, TypeScript, WordPress

Backend: Java, Go, Python

Database & Cloud: MySQL, SQL, NoSQL, AWS

Engineering: Full Stack Development, Mobile Development, System Design, REST APIs, Technical Leadership, Code Review, AI-Assisted Development
